Aieden_DYNAMIC

Aieden DYNAMIC is a swing-trading algorithm generating BUY and SELL signals for the Nasdaq100 index. Aieden DYNAMIC uses frequency based filters, statistical techniques and volatility adjustment to identify highs and lows in the price of the Nasdaq_100 index and initiate signals at the respective HIGH and LOW price levels. Some key technologies used in Aieden DYNAMIC are zero-lag filters used in a proprietary way for added noise rejection and ATR filters for trend and volatility detection.

Aieden DYNAMIC has been under development and testing for a period of 18 months and has generated live performance in 2022 consistent with backtest results. Aieden DYNAMIC is available on the cTrader Copy ecosystem and our master strategy provider account is hosted by Skilling, a globally regulated international broker.
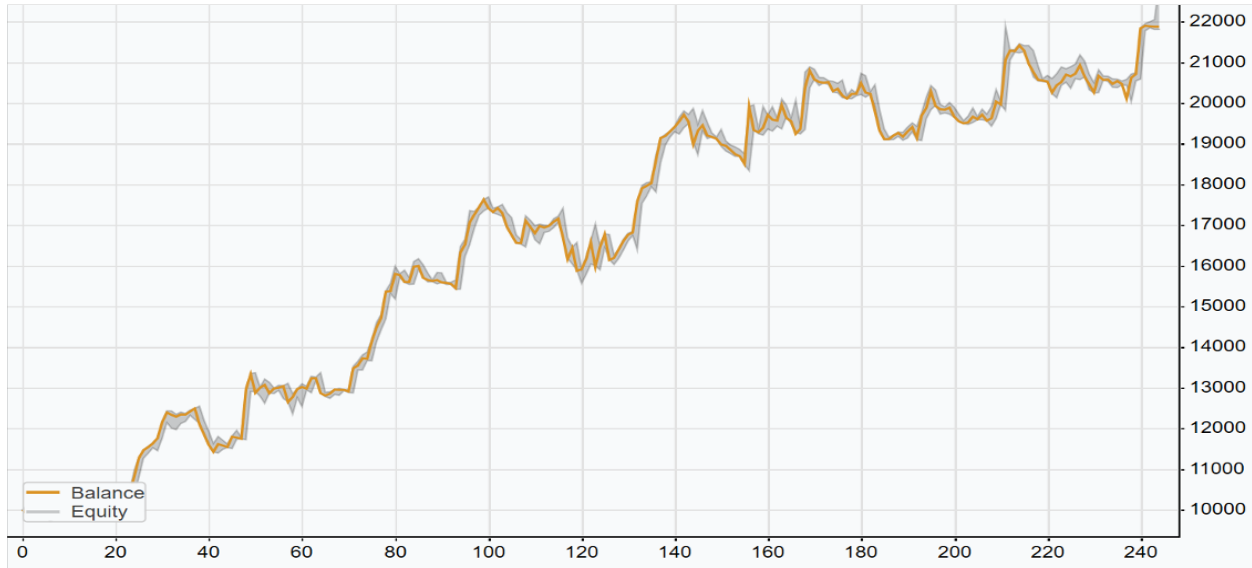

The benefits of mirroring Aieden_DYNAMIC signals with your account on the cTrader Copy ecosystem are as follows:

- Differentiated performance using proprietary techniques
- Turnkey system - works 24/7 on a Contabo, cloud VPS setup optimized for uptime
- Reasonable worst case drawdown of 20%
- Professional development, testing and free upgrades to the algorithm and strategy for users
- Pay for success model with a high watermark (i.e. if you pay for performance that then erodes, you don't pay again until that performance is obtained again)
- Can be copied at will from any supporting cTrader Copy regulated broker (we recommend Skilling to match brokers between Master Strategy account and Copy Account)
- Backtest results back to 2016, in live operation since April 2022
- Backed by a company with public profile founders, offering support services

To open an account on Skilling, use the following link:

https://bit.ly/3E3E95k

Below you can see the backtest performance of Aieden DYNAMIC from 1/1/2022 to 1/10/2022. This performance is achieved with 1 proportional leverage (which means the algorithm signals take into account that the portfolio money is invested in full but without additional leverage).

Now we look at the trade statistics tab and we see that we had 243 trades in this period, 127 which were winners and 116 which were losers. We can also see that the maximum equity drawdown (which is the worst case loss from high to low in the account in this period) was 11.99%. We recommend that a user only subscribe to the algorithm if they can tolerate up to 2x the worst case drawdown. This means that up to 24% drawdown could happen in normal operation of the trading system strategy.

Summary	All Trades	Long Trades	Short Trades
Net Profit	11 872.12	3 087.04	8 785.08
Profit Factor	1.66	1.35	1.94
Commission	0.00	0.00	0.00
Max Balance Drawdown	9.87%	-	-
Max Equity Drawdown	11.99%	-	-
Total Trades	243	122	121
Winning Trades	127	62	65
Max Consecutive Winning Trades	16	9	8
Largest Winning Trade	1 407.11	1 090.57	1 407.11
Losing Trades	116	60	56
Max Consecutive Losing Trades	9	6	5
Largest Losing Trade	-617.06	-602.16	-617.06
Average Trade	48.85	25.30	72.60

Net Profit	Starting Capital	Ending Balance	Ending Equity
12 922.89	10 000.00	21 872.12	22 922.89

We run a cTrader instance on a Contabo extra secure VPS server that has 24/7 uptime maintenance. We also ensure that Aieden_DYNAMIC sends heartbeat signals every hour so that we can intervene in case there is any issue in the execution of the algorithm or the hardware it runs on. You can rest assured that the deployment of the algorithm is professionally managed

If you would like to follow the strategy signals either with a demo or live account please take the following steps:

Step 1: Create your own cTtrader account on a cTrader Copy supporting broker
Open a cTrader account on any broker that supports cTrader Copy. We recommend Skilling as our strategy provider account is there.

https://bit.ly/3LXANCW

Step 2: Go to cTrader Copy Marketplace
Visit the cTrader Copy ecosystem marketplace directly to the Aieden_DYNAMIC page
Follow the link below to get directly to the cTrader Copy ecosystem page for Aieden_DYNAMIC. User your cTrader credentials from Step 1 to log into the copy ecosystem page.

https://app.ctrader.com/copy/strategy/54178

Here you can see the strategy description and the terms. We charge 25% performance fee which means we only get rewarded if the signals are creating profits for your account. cTrader Copy employs a high watermark model which means that if we grow one month but then struggle another month to grow - the platform and broker will make sure that we do not get rewarded again until we can re-grow your account equity to the point that it was when you paid us performance fees. This means you do not double pay for the same equity performance due to algorithm volatility.

You need a minimum of 1k to trade the strategy. In the future we aim to have offerings for 1k, 5k and 20k minimum buy-in. We will then continue improving our strategies and deploy our best technologies on the higher minimum strategy, the next best set of technologies on the mid-range and finally our less mature technology on the lowest buy-in strategies. For now we deploy the best technology with a low buy-in of 1k.

Step 3: Click on follow strategy
Its that simple - by clicking on "Start Copying" your account will mirror the trades in our provider account.
